

Thermal Transfer Solutions

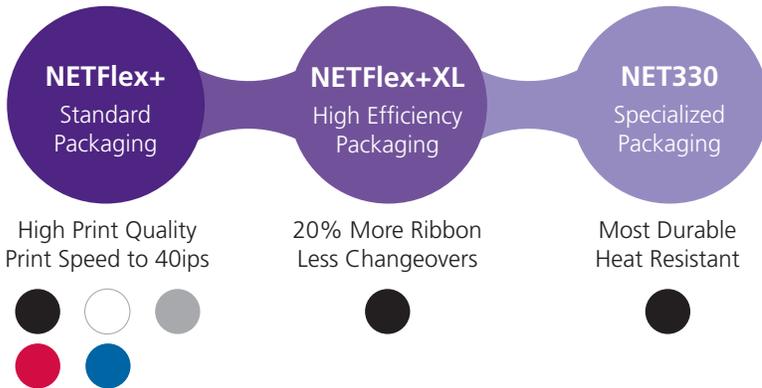

Flexible Packaging for Food

With lower cost and high performance, food and beverage manufacturers are fueling growth of flexible packaging. Variable information like date, price and lot codes are applied to packages via thermal transfer technology. Thermal Transfer Overprinters (TTO) are integrated into vertical and horizontal form, fill and seal equipment, playing a critical role in track and trace and food safety.

High Speed Coding Maximizes Productivity

Thermal Transfer Overprint Ribbons

Printer Compatibility

- Markem® SmartDate®
- Videojet® DataFlex®
